PROFESSIONAL SUMMARY

A recent Computer Technology graduate equipped with basic data analytical skills and a proven ability to collect, process, and interpret datasets to support decision-making, with a specific interest in the Education, Automotive, and Sports Performance sectors. Possesses hands-on experience in team leadership, project management, and analyzing user behavior patterns. Additionally, demonstrates a solid foundation in UI/UX design and is highly skilled in leveraging AI tools across diverse fields, including task automation, content generation, and creative problem-solving.

EDUCATION

Higher Technological Institute (HTI) – Beni Suef

Department: Technology for Preparing, Maintaining, and Developing Computer Systems and Programs | Grade: Very Good | Graduation Year: 2026

GRADUATION PROJECT

SANAD – Integrated Care System for People with Special Needs

Role: Team Leader & Data Specialist

- Led a team to develop a comprehensive web-based system providing healthcare, educational courses, and communication with doctors.
- Specialized in collecting and analyzing user and patient data to identify priority groups and track website usage patterns.
- Authored complete project documentation, detailing analytical methodologies and results.
- Contributed to UI/UX design to facilitate online/offline appointment bookings and access to educational content.

PROFESSIONAL DEVELOPMENT & COURSES

- **Data Analysis Course** – AMIT (Ongoing, 3-month intensive program): Focus on analytical tools, query languages, and data visualization.
- **UI/UX Design Course** – (Completed): Focus on prototyping and user interface design using Figma.

EXTRACURRICULAR & LEADERSHIP ACTIVITIES

Organizing Committee Member – Higher Technological Institute

- Coordinated and managed the freshman orientation event, demonstrating strong organizational and leadership capabilities.
- Organized the Upper Egypt Sports Tournament, showcasing event management and cross-team coordination skills.
- Managed logistics for the Ministry Committee's inspection visit, displaying professionalism and ability to perform under pressure.

TECHNICAL SKILLS

Programming	Basic knowledge of PHP, C#, C++
Databases	SQL Server, XAMPP (phpMyAdmin)
Artificial Intelligence	Skilled in leveraging AI tools across diverse fields (task automation, content generation, UI/UX design support, creative problem-solving)
Data Handling	Solid capabilities in data aggregation, processing, and basic analytics
Digital Marketing & Social Media Analytics	Proficient in digital marketing strategies, performance tracking, audience engagement analysis, and campaign optimization
Design	Proficient in Figma (UI/UX Prototyping)
Office Suite	Advanced proficiency in Microsoft Word and Excel (reporting and data processing)

CORE COMPETENCIES

- Leadership & Team Collaboration
- Fast Learning & Adaptability
- High Organizational & Event Management Skills
- Effective Communication & Stakeholder Engagement

LANGUAGES

- **Arabic:** Native
- **English:** Intermediate
